FATHER'S DAY MANICOTTI MODEL PLANE

Transform different pasta shapes into a model airplane for a super gift for Dad.

Materials Needed:

- 1 large manicotti noodle
- 2 medium rigatoni noodles
- 2 lasagna noodles
- 2 fettuccini noodles, broken into 2-inch lengths
- 1 large pasta shell (optional)

Glue - It is best if adult glues the pieces together with hot glue.

Assembly of the Biplane

Place 1 lasagna noodle flat on the table. Center manicotti across lasagna noodle and glue. Glue 2 rigatoni noodles upright on the ends of the lasagna noodle. Glue the other lasagna noodle on top of the manicotti; glue to rigatoni noodles, too. Glue pasta shell to front end of manicotti (if you want a cockpit). Glue 3 fettuccini pieces on top of the other end of the manicotti for the tail. Glue 2 fettuccini pieces in an X shape and glue it to the front of the "cockpit" shell for a propeller. Have the children paint the biplane with tempera paint any color they desire.
